

PROJECT – LANKA JOURNEY

The best experience for you

By DevSphere
COM1305

Purpose:

Given a traveler's budget, time, interests, comfort preferences and transportation preferences, construct a suitable Sri Lankan journey within their constraints.

1. What LankaJourney needs to understand about the traveler**Budget:**

- Accommodation budget
- Food budget
- Transport budget
- Activity budget
- Total budget
- Budget per day (optional)

Duration:

- Number of Days
- Number of Nights

Preferred Destinations / Areas

- Upcountry
- Down South
- Beach
- Historical
- Cultural
- Religious
- Wildlife
- Adventure
- Shopping
- Nature

There can be multiple choices for this

2. Activity / Journey Style

Journey Style:

- Relaxing
- Adventurous
- Hiking
- Cultural
- Wildlife
- Beach
- Photography
- Family
- Romantic

Physical Activity Level

- Low
- Medium
- High

3. Weather preference

- Cool
- Warm
- Hot
- Dry
- Rainy / don't mind rain

4. Luxury / Comfort Level

Accommodation:

Budget / Standard / Luxury

Transport:

Economy / Comfortable / Premium

Food:

Budget / Standard / Premium

Overall comfort level:

Budget / Standard / Luxury

5. Transportation

Main Transportation preference:

- Private Vehicle
- Public Bus
- Train
- Mixed

For Private vehicle:

- Own vehicle
- Rental vehicle

For rental:

- Number of passengers
- Comfort requirement
- Luggage amount
- Driver required? [Yes/No]

6. Accommodation

Accommodation needs information like

- Accommodation_ID
- Name
- Type
- Location
- Price
- Rating
- Luxury_Level
- Facilities
- Food_Available
- Contact

7. Foods

We provide food suggestions only when food facilities aren't available in accommodation place

For External Restaurant:

- Restaurant_ID
- Restaurant_Name
- Cuisine_Type
- Location_ID
- Price_Level
- Opening_Hours

- Rating
- Description

Place Types:

- Natural
- Historical
- Religious
- Adventure
- Beach
- Wildlife
- Shopping
- Cultural

One place can belong to more than one types.

9. Public Transportation accessibility

We gather following information for each tourist place

- Bus access: Distance to nearest bus station
- Train access: Distance to nearest railway station
- Walking distance

10. Road Network

We use API of google maps for mapping:

- Coordinates
- Distance
- Driving route
- Travel time
- Directions

11. Procedure of generating best route

We use scoring systems for calculating best combination. Here we use following criteria:

- Budget compatibility
- Destination preferences
- Weather compatibility
- Activity compatibility
- Travel time
- Accommodation compatibility
- Transport compatibility

12. Data Structure

We divide whole database to data modules

- Traveler
- Location
 - Province
 - District
 - Town
- Tourists Places
 - Place
 - Place type
 - Accessibility
 - climate

- Accommodation
 - Accommodation
 - Room
 - Facility
 - Type
